## DETAILED ACTION

### *Allowance of Claims*

1. Claims 1-4, 6-8, 10, 12-18 and 21-23 are allowed.
2. The following is an examiner's statement of reasons for allowance: Marumo et al. (US Pre-Grant Publication 2003/0000458) and Ju et al. (Korean Patent Publication 2000-0020879) were found to be the most relevant instances of prior art with respect to the claim limitations presented in the application. Marumo taught an apparatus comprising, among other features, a quartz product, and a method involving treating and analyzing portions of the quartz product via chemical means. Ju et al. teach a device resembling the instant application's claimed "examination assistant device," referred to in the Ju et al. reference as a "defect check tool." The defect check tool disclosed in Ju et al. is shown below.

Drawing 1. "Defect Check Tool" as disclosed in *Ju et al.*

From the diagram above, one will note that the Ju et al. device does not comprise "a pair of end plates configured to engage" with grooves on the quartz product or a "solution receiver" portion provided in between the end plates, configured with

"dimensions for storing a process solution including an etching solution ...to hold the process solution in contact with the examination objective portion [of the quartz pole member]..." Because the Ju et al. tool lacks groove-engaging side/end wall structures, the space provided between the side walls would function as a flow-through channel if paired with a grooved quartz product, rather than as a "solution receiver ...for storing the process solution," as in the examination assistant device claimed in this application.

Neither Marumo nor Ju provides explicit disclosure for modifying the Ju et al. device with groove-engaging end plates, or combining the teachings in such a way as to result in the apparatus recited in the instant claims. Thus, claims 1-4 and 6-8 are allowable over the prior art. Along similar lines of reasoning, the combination of Marumo with Ju to produce the method for examining a part of a quartz product featuring the preparation and use of an examination assistant device with the distinguishing features discussed above is deemed non-obvious in view of the prior art of record. Claims 10, 12-18 and 21-23 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
